So, what is Sentimental Analyzer ?

Sentimental Analyzer is your go-to tool for understanding feelings and opinions in any format—whether it's text, audio, reviews, or news articles.

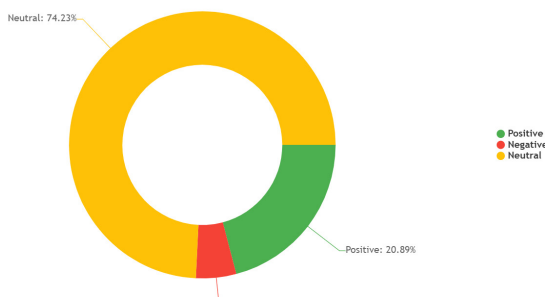

How to use Sentimental Analyzer?

Using Sentimental Analyzer is easy: just upload your document, text, or link to the content you want analyzed. In seconds, you'll have clear insights into the sentiment—sit back and let the results come to you!

Sentiment analysis reveals the emotions behind words, helping us understand whether people feel about a topic. This visualization makes it easy to see the overall mood at a glance.

Sentiments Distribution

Future Enhancement

1. Dockerization

We plan to Dockerize the project to create a consistent, portable environment that simplifies deployment and improves collaboration.

2. Support more websites

Currently, we support sentiment analysis on Amazon reviews, and in the future, we plan to expand to platforms like Twitter, Reddit, and more to capture a broader range of opinions.

3. Upgrade the analyze logic

In the future, we plan to improve our analysis logic to enhance accuracy, capture nuanced sentiments, and provide deeper insights.

New Features and Improvements!

Authentication

Implemented an authentication feature to make logging in easy and secure for every user.

News Analysis Improvement

Used Google News Scraper to bring you sharper, up-to-date news analysis.

Detailed analysis for Product

Provide in-depth analysis for each product by examining individual reviews to capture detailed insights.

More robust tests

Expanded testing coverage with over 65 robust tests on both the frontend and backend to ensure accurate and reliable analysis.
