WOLFTRACK6.0

About

Wolftrack6.0 is an online platform for the easy and efficient organization in your pursuit of internships and full-time job opportunities. This platform allows you to expedite your application process and track every step of your career path. It provides features to help manage job applications, deadlines and important documents (resumes). WolfTrack6.0 is your ticket to success, guiding you through the twisting paths of employment prospects with ease. This platform was created with the intention of helping anyone looking for a job or an internship. It may be a college student in any year, a working professional looking to switch or even someone trying to go into an industry for the first time.

Implementation Milestones for Future

1. Sending Reminders through SMS Notification/Emails

Include an option of providing contact number to receive SMS notifications based on interview dates and job deadlines.

2. Resume Template Editor

Provides users with an option to directly edit and make changes in their resume on the website.

3. Bookmarking liked jobs

Provide users to save jobs which they prefer for future references.

4. Recommendation System for jobs

Implement content based/ collaborative filtering models or a hybrid of them to provide suggestions to users about jobs tailored to their preferences or similarity with other users.

Why WolfTrack6.0 better than WolfTrack5.0?

Centralized Job Application Management

It centralizes all job application information, including deadlines, statuses, and documents, into a single, user-friendly dashboard. This eliminates the need to rely on various tools such as spreadsheets, email threads and notebooks. This makes the process more organized and less stressful.

Streamlined Salary insights about the job

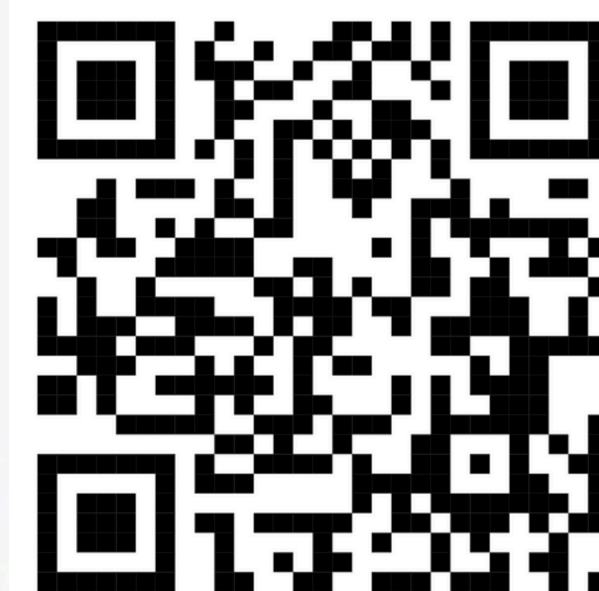

The website provides a separate page to view statistical data about job salaries based on factors such as locations and job roles. This provides analysis about jobs and helps users to filter out jobs of their preferences, allowing them to make optimal decisions. Statistical analysis is provided through graphs and plots.

Comprehensive resources for interview preparation

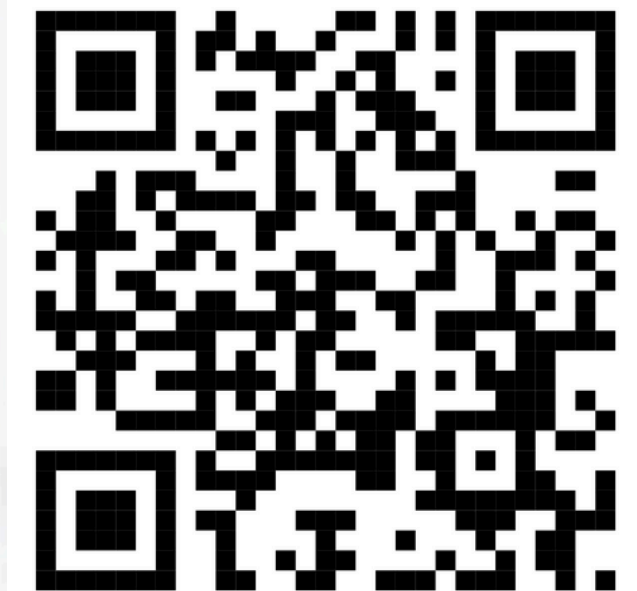

WolfTrack 6.0 offers an entire webpage, providing access to comprehensive details about interview preparation. It provides links redirecting to important websites, crash courses and demo tutorials/videos for important concepts based on various job positions.

Enhanced User Experience with Scraping jobs from internet

This new version of the portal offers real time updated information by scrapping jobs from Internet based on job roles and location. This will help users to get live updates about job postings and give them option to view job description and click on links provided to apply to jobs of their choices.
