YOUR CAMPUS JOB MATCHMAKER - WOLFJOBS

Group12 Min-Ting Tu, Siddhi Khaire, Sidharth Shambu
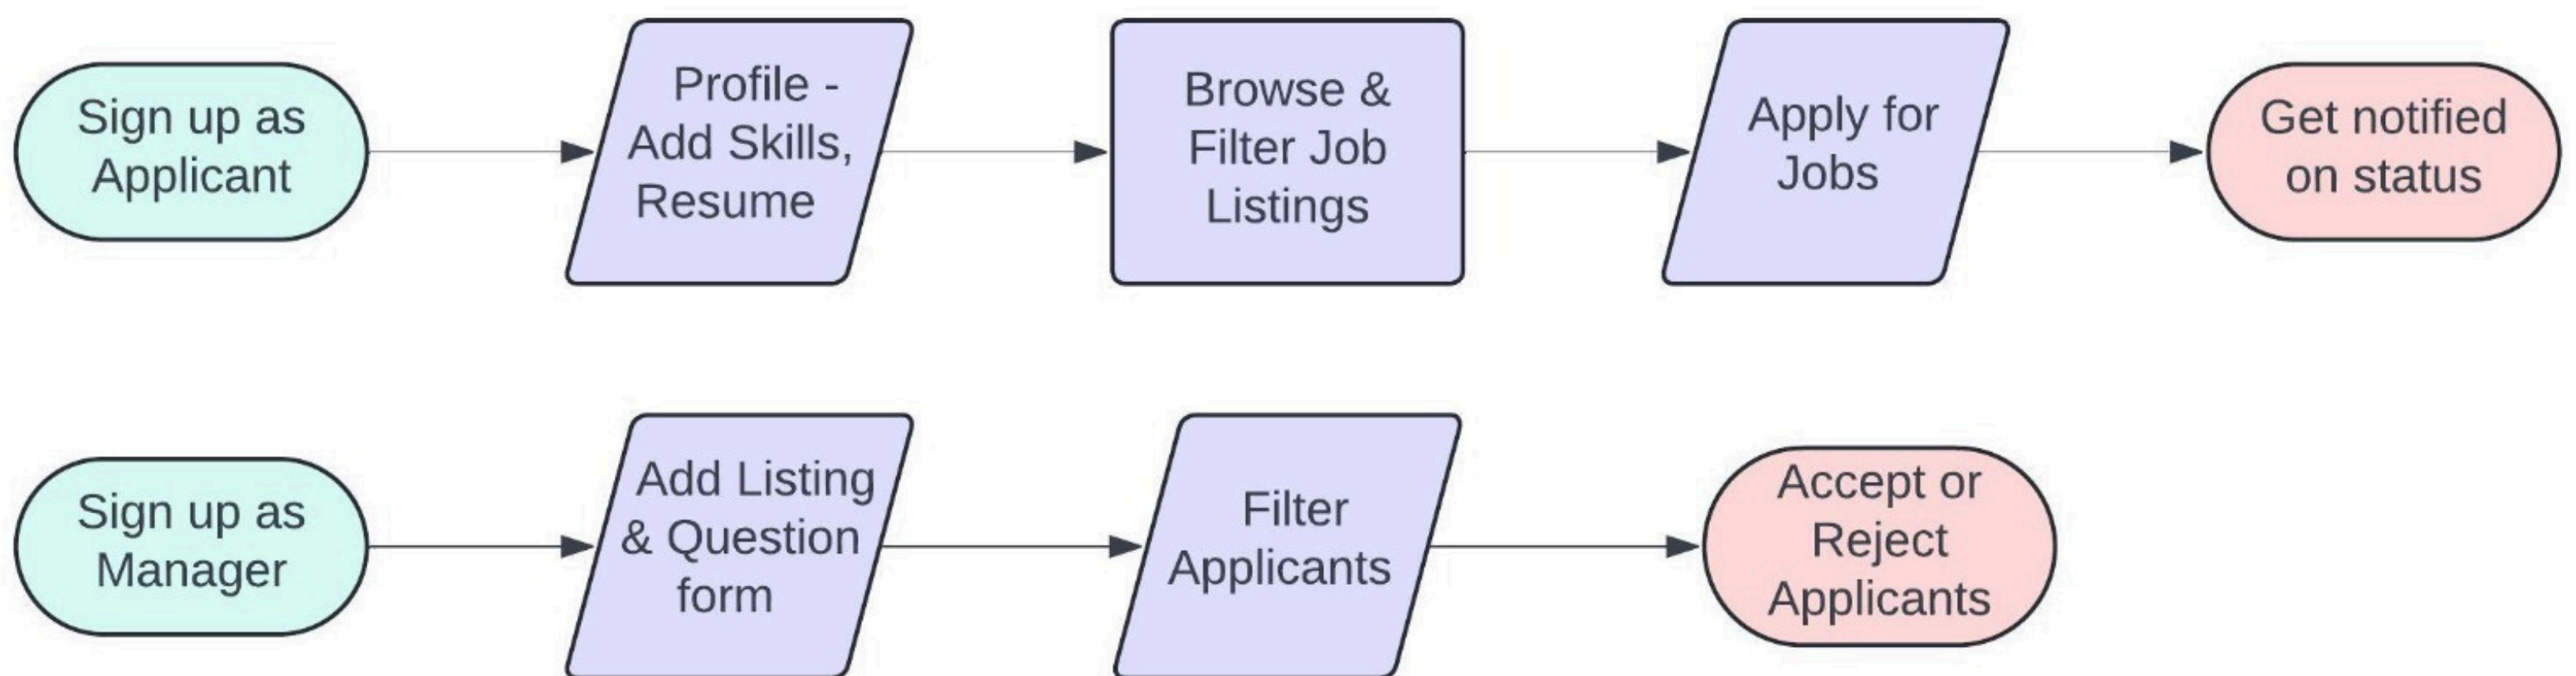

Introduction

Need help finding a job on campus? Need to find a suitable employee? WolfJobs is a job portal that connects recruiters with candidates looking for temporary or full-time opportunities. It offers features like seamless resume upload, searching / finding jobs based on filters and a notifications tab for real-time updates.

Tech Stack

Flow Chart

Sign up as Applicant → Profile - Add Skills, Resume → Browse & Filter Job Listings → Apply for Jobs → Get notified on status

Sign up as Manager → Add Listing & Question form → Filter Applicants → Accept or Reject Applicants

Enhancements

- New Chat Interface: Direct communication between applicants and recruiters

- Bug Fixes: Ensured unique emails for job applicants and recruiters

- UI Revamp: Sleeker, user-friendly experience

- AI-Driven Question Suggestions: Tailored questions based on job description

Future scope

- Interview appointment scheduling
- Part-time job shifts tracking and management for employees and employers
- Applicant video submission for screening
- Job analysis for employers to decide on pay and other perks to offer for the job.

GitHub Repo

Siddhi Khaire Self Evaluation (skhaire)

Notes	Self Evaluation	evidence
Self Evaluation Total	85	Repo Link
Workload is spread over the whole team (one team member is often Xtimes more productive than the others…	2	Github-Insights
nevertheless, here is a track record that everyone is contributing a lot)	3	evidence in GH
Number of commits	1	in GH
Number of commits: by different people	3	in GH
Issues report: there are **many**	2	
Issues are being closed	2	evidence in GH
Docs: doco generated, format not ugly	3	ReadMe
Docs: what: point descriptions of each class/function (in isolation)	3	
Docs: how: for common use cases X,Y,Z mini-tutorials showing worked examples on how to do X,Y,Z	3	doc page entries

Docs: why: docs tell a story, motivate the whole thing, deliver a punchline that makes you want to rush out and use the thing	3	
Docs: short video, animated, hosted on your repo. That convinces people why they want to work on your code.	2	
Use of version control tools	3	
Test cases exist	1	dozens of tests and those test cases are more than 30% of the code base
Test cases are routinely executed	1	GitHub Actions
Issues are discussed before they are closed	3	even if you discuss in slack, need a sumamry statement here
Chat channel: exists	2	Link or screenshots
Test cases: a large proportion of the issues related to handling failing cases.	3	If a test case fails, open an issue and fix it
Evidence that the whole team is using the same tools: everyone can get to all tools and files	3	Configuration File

Evidence that the whole team is using the same tools (e.g. config files in the repo, updated by lots of different people)	3	
Evidence that the whole team is using the same tools (e.g. tutor can ask anyone to share screen, they demonstrate the system running on their computer)	3	
Evidence that the members of the team are working across multiple places in the code base	3	[GitHub Branches](#)
Short release cycles	1	
The file .gitignore lists what files should not be saved to the repo. See [examples]i(https://github.com/github/gitignore)	3	[.gitignore](#)
The file INSTALL.md lists how to install the code	3	[Install md](#)
The file LICENSE.md lists rules of usage for this repo	3	[LICENSE md](#)
The file CODE-OF-CONDUCT.md lists rules of behavior for this repo; e.g. see [example](#)	3	[CODE OF CONDUCT](#)

The file CONTRIBUTING.md lists coding standards and lots of tips on how to extend the system without screwing things up; e.g. see example	3	CONTRIBUTING md
The file README.md contains all the following	3	README File
Video	2	
DOI badge: exists. To get a Digitial Object Indentifier, regiser the project at Zenodo. DOI badges look like this:	2	
Badges showing your style checkers	2	
Badges showing your code formatters.	2	
Badges showing your syntax checkers.	2	
Badges showing your code coverage tools	2	
Badges showing any other Other automated analysis tools	2
